# Acknowledgements

- I'd like to say thank you to Ms.Pratibha, Ms.Smita for teaching us this internship very well and taking the time and effort to make sure that we have absolutely no doubts. I'd also like to thank my fellow students because they've been helpful in the chat section and participated to make the internship exciting. And I'd also like to thank Mr. Ken Khan for providing us with this opportunity to learn AI through Snap!.

# About Me..

- My name is Anas Shaaban, I'm 16 years old and in year 12. I'm an aspiring computer scientist and I'm also a competitive swimmer.

# About My Internship with Clevered..

- The internship has been extremely informative in learning about speech synthesis and voice recognition and using the programming language Snap!. It has also been very enjoyable.

# About App..

- The main menu tells you with speech synthesis about the story of the game and then to say “start” to start playing. The game then progresses through different levels and you can do different things by saying different words. For example, when you say left you go left.
- The game is about a character trying to find his grandpa’s lost treasure and the journey through different areas of the world which are a level each. The game is designed for people with visual impairments or just people driving that want to have fun and can’t look at a screen.

# How do I use the App?

The way all the actions are performed in the app are done by voice recognition. There are 4 main words to use right, left, duck and jump. There are new words introduced to the user when progressing through levels like sneak and insta-kill.

# Option Name

(This will be repeated for each option of the App)

Here are all the pictures of all the levels/options in my game.

# Contact Person

- My email is [anooshani@yahoo.com](mailto:anooshani@yahoo.com) or [anasshaaban@yahoo.com](mailto:anasshaaban@yahoo.com)

**Thank you!**
